Contribution to Australia’s national benefit:
NRPG’s relevant to research previously supported by the MNF are described in each Annual Report. Copies are available for reference on the MNF Website at: www.marine.csiro.au/nationalfacility/annual/index.html

As a result of this voyage:
1. We have a better understanding of the variability of the transport of water from the Pacific to the Indian Ocean and the impact on global and regional climate.
2. We have acquired an 18-month time series of the transport variability in the Timor Passage and Ombai Strait.
3. We have mapped the across passage upper ocean transport for the Timor Passage between Timor Leste and the Australian Continental shelf.
4. We have commenced a program that will provide a long term monitoring of the transport of water and its properties between the Pacific and Indian Ocean.

Voyage ss2012_v05
Bernadette Sloyan, Chief Scientist, CMAR

Itinerary
Departed Darwin 10:00, 26 September 2012
Arrived Darwin 13:00, 9 October 2012
